Memorandum

Date: _____
From: Division of Dietary Supplement Products, Office of Nutritional Products,
Labeling and Dietary Supplements, HFS-810
Subject: 75-Day Pre-market Notification of New Dietary Ingredients
To: Dockets Management Branch, HFA-305

Subject of the Notification: (Sanqi) *Panax notoginseng*
Firm: Cyber Store LLC

Date Received by FDA: June 5, 2003

90-Day Date: September 4, 2003

In accordance with the requirements of section 413(a) of the Federal Food, Drug, and Cosmetic Act, the attached 75-day pre-market notification and related correspondence for the aforementioned substance should be placed on public display in docket number 95S-0316 as soon possible since it is past the 90-day date. Thank you for your assistance.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

Food and Drug Administration
College Park, Maryland 20740

AUG 20 2003

Mr. Yao (Eric) Huang
General Manager
Cyber Store LLC
77 Mangolia Avenue
Apartment 32
Jersey City, NJ 07306

Dear Mr. Huang:

This is to inform you that the notification, dated January 11, 2003, you submitted pursuant to 21 U.S.C. 350b(a)(2)(section 413(a)(2) of the Federal Food, Drug, and Cosmetic Act (the Act)) was filed by the Food and Drug Administration (FDA) on June 5, 2003. This is a resubmission of your original notification dated January 11, 2003, to which we responded on May 12, 2003. Your current notification concerns the substance called Panax notoginseng Burk. (sanqi) that you intend to market as a new dietary ingredient in the "Notoginseng (Sanqi) Instant and Capsules" products.

The description of the "Instant" form of the dietary supplement in the notification states that 1.2 g of the sanqi extract will be present in a 5 g serving of the instant product. The notification recommends that 5 g of the instant product be diluted in 100 ml of liquid and consumed three times daily. The description of the "capsulated form" of the dietary supplement in the notification states that 296 mg of the sanqi extract will be present per capsule.

Under 21 U.S.C. 350b(a)(2), the manufacturer or distributor of a dietary supplement that contains a new dietary ingredient that has not been present in the food supply as an article used for food in a form in which the food has not been chemically altered must submit to FDA, at least 75 days before the dietary ingredient is introduced or delivered for introduction into interstate commerce, information that is the basis on which the manufacturer or distributor has concluded that a dietary supplement containing such new dietary ingredient will reasonably be expected to be safe. FDA reviews this information to determine whether it provides an adequate basis for such a conclusion. Under section 350b(a)(2), there must be a history of use or other evidence of safety establishing that the new dietary ingredient, when used under the conditions recommended or suggested in the labeling of the dietary supplement, will reasonably be expected to be safe. If this requirement is not met, the dietary supplement is deemed to be adulterated under 21 U.S.C. 342(f)(1)(B) because there is inadequate information to provide reasonable assurance that the new dietary ingredient does not present a significant or unreasonable risk of illness or injury.

FDA has carefully considered the information in your submission, and the agency has significant concerns about the evidence on which you rely to support your conclusion that a dietary supplement containing Panax notoginseng Burk.(sanqi), when used under the conditions recommended or suggested, will reasonably be expected to be safe. While your

notification adequately describes the level of the new dietary ingredient, Panax notoginseng Burk.(sanqi), in both the "Notoginseng (Sanqi) Instant and Capsules" products, your notification did not provide information regarding the conditions of use recommended or suggested for Panax notoginseng Burk.(sanqi), in the "Notoginseng (Sanqi) Capsules" product. In addition, your notification did not provide complete English translations of all submitted information which precludes accurate evaluation of your information.

For the reasons discussed above, the information in your submission does not provide an adequate basis to conclude that Panax notoginseng Burk.(sanqi) in the "Notoginseng (Sanqi) Instant and Capsules" products, when used under the conditions recommended or suggested in the labeling of your product, will reasonably be expected to be safe. Therefore, your product may be adulterated under 21 U.S.C. 342(f)(1)(B) as a dietary supplement that contains a new dietary ingredient for which there is inadequate information to provide reasonable assurance that such ingredient does not present a significant or unreasonable risk of illness or injury. Introduction of such a product into interstate commerce is prohibited under 21 U.S.C. 331(a) and (v).

Your notification will be kept confidential for 90 days after the filing date of June 5, 2003. After the 90-day date, the notification will be placed on public display at FDA's Docket Management Branch in docket number 95S-0316. Prior to that date, you may wish to identify in writing specifically what information you believe is proprietary, trade secret or otherwise confidential for FDA's consideration.

If you have any questions concerning this matter, please contact Victoria Lutwak at (301) 436-2375.

Sincerely yours,

A handwritten signature in black ink, appearing to be 'SJW', written in a cursive style.

Re: Marketing dietary ingredients under
Supplement Health and Education Act.

Cyberstore LLC is requesting marketing clearance for its Sanqi(a Chinese edible herb)
Instant and Capsules. The pre-market notification information required by FDA's Office
of Special Nutritional is as follows:

- a. Classification name: Notoginseng(Sanqi) Instant and Capsules
Latin binomial name: panax notoginseng(Burk) F.H.Chen
Common/Usual Name: Sanqi instant and Capsules
- b. Classification: Dietary supplements and their ingredients are governed and
regulated under the Dietary Supplement Health and Education Act. Pursuant to
Section 8 of the Act such dietary supplements must reasonably be expected to be
safe. In consideration of the provisions of this new legislation, Cyberstore LLC.
desires to import Notoginseng(sanqi) Instant and Capsules for use as a dietary
ingredient in dietary supplements and as a standardized dietary supplement
product. The product has passed the acute toxicity test in China and proved to be
safe. The product also get the permission to be sold in Japan, Indonesia,
Philippine. It all proved that it is reasonably be expected to be safe.

8 4629

- c. Label/Labeling/Advertisements: Draft copies of the package labeling and promotional material, acute toxicity test report for Notoginseng instant and Capsules are enclosed as Exhibit 2.
- d. Certifications: The product is produced by Yunnan Xin Yun Sanqi Industrial Co., Ltd. Complies with the requirements of Chinese Good Manufacturing Practice for health food. (See the attachment for the original copy of Sanitary Supervise Official Dispatch of People's Republic Of China and the Permission for marketing this product as dietary supplements in China and The Report of Examination issued by Chinese government to show the product is safe to human beings).

We would appreciate your earliest attention to this submission. The Notoginseng(sanqi) Instant and Capsules will not be marketed in U.S market until we receive FDA clearance of our submission or upon the expiration of 75 days from this submission.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Yao(Eric) Huang', with a long horizontal line extending from the end of the signature.

The report of examination

The serial number of report:0006

Sample name: notoginseng herbal tea	Serial number of sample: health 2006
Production date: 2001/3/9	Quantities: 7.0kg
The unit of sample issued: Yunnan Xin Yun Sanqi industrial Co, Ltd .	
Manufacturer: Yunnan Xin Yun Sanqi industrial Co, Ltd .	

Date of sample issued:2001/4/2

Delivered by: Libin

Date of accept sample:2001/4/2

Exam Items:

1. The acute toxicity test on rat and mouse by raising them "Xin Yun notoginseng instant "
2. The test of bone marrow cell micro-nuclear and sperm's deformity on mouse.
3. Lopsided-caused
4. Big mice fed with Xin Yun notoginseng instant
5. Mouse typhus Salmonella and mammal particle body enzyme test

Technological standard : GB 15193.3-94. 4-94. 5-94. 7-94. 14-94.13-94 from The people's Republic of China.

The main test equipment: large-scale biomicroscope, the biochemical equipment .etc.

The environmental condition for the test: room temperature 16 ° C--20 ° C, relative umidity:25%--55%.

Conclusion:

- 1 It has not caused animal's death, by giving rat and mouse enema with the dosage up to 15g/kg of Xin Yun notoginseng instant issued by Yunnan Xin Yun Sanqi industrial Co,Ltd .So it has been testified that Xin Yun notoginseng is safe and nonpoisonous according to the standard of acute toxicity and toxicity dosage.
- 2 As a result of no obvious difference between "test group" and "contrasted group". after the test of bone marrow mirco-nuclear and mouse's sperm's deformity It indicates that Xin Yun notoginseng instant has no potential effect on causing sudden change and sperm lopsided.
- 3.From the test of causing lopsided by feeding mouse with Xin Yun notoginseng instant, no obvious difference have found between "solvent contrast group "and "the test group". The weight and height of Fetus are not unusual compared "test group" and "contrast group". And there are no remarkable disparity found from observing skeleton transparent and viscera sample.
- 4.We add Xin Yun notoginseng instant into fodder, feeding wistar mouse for 30 days When the amount of instant powder reach up to 3 times, 50times, and 100times respectively as the intaked amount of human beings daily, the animal's general physiological state is normal .and the behavior of animals has not found unusual. Neither poison nor death appear. Both blood index and biochemistry index is normal basically as well as the coefficient value of liver and kidney. On the view of pathology

histology, there are no obvious damaged-change in liver, kidney, stomach. twelve mean intestines, colon rectum organization. Taking the dosage of 156.25-10000 u g/ware of Xin Yun notoginseng instant, no positive displays on fungus. No matter we add S9,TA97,TA98,TA100,TA102 or not. Under this experiment, Xin Yun notoginseng instant has no function to cause sudden change.
